Software Testing Documentation

1. Purpose of the Document

The purpose of this document is to describe the testing activities performed for the **Credit Card Approval Prediction Using Machine Learning** project before the final release. It summarizes the testing process, defects identified and resolved, and the overall quality of the application. The document also ensures that the system meets the functional and non-functional requirements before deployment.

2. Defect Analysis

The following table summarizes the defects identified during testing.

Resolution	Critical (S1)	High (S2)	Medium (S3)	Low (S4)	Total
Fixed	3	2	4	3	12
By Design	0	1	1	2	4
Duplicate	0	0	1	0	1
Not Reproduced	0	0	1	0	1
Won't Fix	0	0	0	1	1
Total	3	3	7	6	19

Common Defects Identified

- Invalid input validation.
- Missing value handling.
- Incorrect prediction display.
- UI alignment issues.
- Minor formatting problems.

Most defects were corrected before the final release.

3. Test Case Analysis

Module	Total Test Cases	Not Tested	Failed	Passed
User Interface	6	0	0	6
Applicant Data Validation	5	0	0	5
Data Preprocessing	4	0	0	4
Machine Learning Prediction	5	0	0	5
Streamlit Application	4	0	0	4
Result Display	3	0	0	3
Performance Testing	3	0	0	3
Total	30	0	0	30

4. Test Summary

Metric	Value
Total Test Cases	30
Passed	30
Failed	0
Not Executed	0
Pass Percentage	100%
